Information Regarding Forward-Looking Statements

This presentation and the statements made during our presentation may contain certain statements relating to future results which are “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, which are intended to be covered by the safe harbors created by those laws.

You can identify these statements by forward-looking words such as “may,” “will,” “should,” “expect,” “anticipate,” “believe,” “intend,” “estimate,” “plan” and “continue” or similar words. We have based these statements on our current expectations about potential future events. Although we believe the expectations expressed in the forward-looking statements included in this presentation and the statements made during our presentation are based upon reasonable assumptions within the bounds of our knowledge of our business, a number of factors could cause actual results to differ materially from those expressed in any forward-looking statements, whether oral or written, made by us or on our behalf. Many of these factors have previously been identified in filings or statements made by us or on our behalf. Important factors which could cause our actual results to differ, possibly materially from the forward-looking statements in this document and statements made during our presentation include but are not limited to the following items: the inability to retain or hire qualified employees, as well as the loss of any of our executive officers or other key employees; acquisition-related risks that could negatively affect the success of our growth strategy, including the possibility that we may not be able to successfully identify suitable acquisition candidates, complete acquisitions, successfully integrate acquired businesses into our operations and expand into new markets; a cybersecurity attack or any other interruption in information technology and/or data security that may impact our operations or the operations of third parties that support us; risks related to our international operations, which may result in additional risks or require more management time and expense than our domestic operations to achieve or maintain profitability; the effects of inflation; the requirement for additional resources and time to adequately respond to dynamics resulting from rapid technological change; the loss of or significant change to any of our insurance company relationships, which could result in loss of capacity to write business, additional expense, loss of market share or material decrease in our commissions; the effect of natural disasters on our profit-sharing contingent commissions, insurer capacity and claims expenses from our capitalized captive insurance facilities; adverse economic conditions, natural disasters, or regulatory changes in states or countries where we have a concentration of our business; the inability to maintain our culture or a significant change in management, management philosophy or our business strategy; claims expense resulting from the limited underwriting risk associated with our participation in capitalized captive insurance facilities; risks associated with our automobile and recreational vehicle dealer services (“F&I”) businesses; risks facing us in our Services segment, including our third-party claims administration operations, that are distinct from those we face in our insurance intermediary operations; the limitations of our system of disclosure and internal controls and procedures in preventing errors or fraud, or in informing management of all material information in a timely manner; the significant control certain shareholders have over the Company; changes in data privacy and protection laws and regulations or any failure to comply with such laws and regulations; improper disclosure of confidential information; our ability to comply with non-U.S. laws, regulations and policies; the potential adverse effect of certain actual or potential claims, regulatory actions or proceedings on our businesses, results of operations, financial condition or liquidity; uncertainty in our business practices and compensation arrangements with insurance carriers due to potential changes in regulations; regulatory changes that could reduce our profitability or growth by increasing compliance costs, technology compliance, restricting the products or services we may sell, the markets we may enter, the methods by which we may sell our products and services, or the prices we may charge for our services and the form of compensation we may accept from our customers, carriers and third-parties; increasing scrutiny and changing expectations from investors and customers with respect to our environmental, social and governance practices; a decrease in demand for liability insurance as a result of tort reform legislation; our failure to comply with any covenants contained in our debt agreements; the possibility that covenants in our debt agreements could prevent us from engaging in certain potentially beneficial activities; changes in the U.S.-based credit markets that might adversely affect our business, results of operations and financial condition; risks associated with the current interest rate environment, and to the extent we use debt to finance our investments, changes in interest rates will affect our cost of capital and net investment income; changes in current U.S. or global economic conditions, including an extended slowdown in the markets in which we operate; disintermediation within the insurance industry, including increased competition from insurance companies, technology companies and the financial services industry, as well as the shift away from traditional insurance markets; conditions that result in reduced insurer capacity; quarterly and annual variations in our commissions that result from the timing of policy renewals and the net effect of new and lost business production; intangible asset risk, including the possibility that our goodwill may become impaired in the future; future pandemics, epidemics or outbreaks of infectious diseases, and the resulting governmental and societal responses; other risks and uncertainties as may be detailed from time to time in our public announcements and Securities and Exchange Commission (“SEC”) filings; and other factors that the Company may not have currently identified or quantified.

Forward-looking statements that we make or that are made by others on our behalf are based upon a knowledge of our business and the environment in which we operate, but because of the factors listed above, among others, actual results may differ from those in the forward-looking statements. Consequently, these cautionary statements qualify all of the forward-looking statements we make herein. We cannot assure you that the results or developments anticipated by us will be realized or, even if substantially realized, that those results or developments will result in the expected consequences for us or affect our, our business or our operations in the way we expect. We caution readers not to place undue reliance on these forward-looking statements. All forward-looking statements made herein are made only as of the date of this presentation, and the Company does not undertake any obligation to publicly update or correct any forward-looking statements to reflect events or circumstances that subsequently occur or of which the Company hereafter becomes aware.
Information Regarding Non-GAAP Measures

This presentation contains references to "non-GAAP financial measures" as defined in SEC Regulation G, consisting of Organic Revenue, EBITDAC, EBITDAC Margin, EBITDAC - Adjusted Post FX, EBITDAC Margin - Adjusted Post FX and Diluted Net Income Per Share - Adjusted Post FX. We present these measures because we believe such information is of interest to the investment community and because we believe it provides additional meaningful methods to evaluate the Company's operating performance from period to period on a basis that may not be otherwise apparent on a GAAP basis due to the impact of certain items that have a high degree of variability that we believe are not indicative of ongoing performance and that are not easily comparable from period to period. This non-GAAP financial information should be considered in addition to, not in lieu of, the Company's consolidated income statements and balance sheets as of the relevant date. Consistent with Regulation G, a description of such information is provided below and a reconciliation of such items to GAAP information can be found within this presentation as well as in our periodic filings with the SEC.

We view Organic Revenue and Organic Revenue growth as important indicators when assessing and evaluating our performance on a consolidated basis and for each of our four segments, because it allows us to determine a comparable, but non-GAAP, measurement of revenue growth that is associated with the revenue sources that were a part of our business in both the current and prior year and that are expected to continue in the future. As disclosed in our most recent proxy statement, we use Organic Revenue growth as a key performance metric for our short-term and long-term incentive compensation plans for executive officers and other key employees. In addition, we believe Diluted Net Income Per Share - Adjusted Post FX provides a meaningful representation of our operating performance and improves the comparability of our results between periods by excluding the impact of the change in estimated acquisition earn-out payables, the impact of foreign currency translation and certain other non-recurring or infrequently occurring items. We also view EBITDAC, EBITDAC - Adjusted Post FX, EBITDAC Margin and EBITDAC Margin - Adjusted Post FX as important indicators when assessing and evaluating our performance, as they present more comparable measurements of our operating margins in a meaningful and consistent manner. We believe that EBITDAC - Adjusted Post FX, EBITDAC Margin - Adjusted Post FX and Diluted Net Income Per Share - Adjusted Post FX provide a better understanding of our results over longer periods of time (e.g. 5 to 10 years).

Non-GAAP Revenue Measures

• **Organic Revenue** is our core commissions and fees less: (i) the core commissions and fees earned for the first 12 months by newly acquired operations; (ii) divested business (core commissions and fees generated from offices, books of business or niches sold or terminated during the comparable period); and (iii) Foreign Currency Translation (as defined below). The term "core commissions and fees" excludes profit-sharing contingent commissions and therefore represents the revenues earned directly from specific insurance policies sold and specific fee-based services rendered. Organic Revenue can be expressed as a dollar amount or a percentage rate when describing Organic Revenue growth.

Non-GAAP Earnings Measures

• **EBITDAC** is defined as income before interest, income taxes, depreciation, amortization and the change in estimated acquisition earn-out payables.
• **EBITDAC Margin** is defined as EBITDAC divided by total revenues.
• **EBITDAC - Adjusted Post FX** is defined as EBITDAC, excluding (i) (gain)/loss on disposal, (ii) Acquisition/Integration Costs (as defined below) and (iii) Foreign Currency Translation (as defined below).
• **EBITDAC Margin - Adjusted Post FX** is defined as EBITDAC - Adjusted Post FX divided by total revenues.
• **Diluted Net Income Per Share - Adjusted Post FX** is defined as diluted net income per share, excluding the after-tax impact of (i) the change in estimated acquisition earn-out payables, (ii) (gain)/loss on disposal, (iii) Acquisition/Integration Costs (as defined below) and (iv) Foreign Currency Translation (as defined below).
Information Regarding Non-GAAP Measures - Continued

Other Non-GAAP Financial Measures - We believe these non-GAAP measures, as defined below, are useful to monitor our leverage and evaluate our balance sheet.

- **Net Debt** is defined as Total Debt Outstanding less cash and cash equivalents excluding restricted cash. “Total Debt Outstanding” is defined as current portion of long-term debt plus long-term debt less unamortized discount and debt issuance costs.
- **Total Debt Outstanding to EBITDAC** is defined as Total Debt Outstanding divided by EBITDAC.
- **Net Debt Outstanding to EBITDAC** is defined as Net Debt outstanding divided by EBITDAC.
- **Free Cash Flow** is defined as net cash provided by operating activities less capital expenditures.
- **Free Cash Flow Conversion** is defined as free cash flow divided by total revenues.

Definitions Related to Certain Components of Non-GAAP Measures

“Acquisition/Integration Costs,” means the acquisition and integration costs (e.g., costs associated with regulatory filings, legal/accounting services, due diligence and the costs of integrating our information technology systems) arising out of our acquisitions of GRP (Jersey) Holdco Limited and its business, Orchid Underwriters Agency and CrossCover Insurance Services, and BdB Limited companies, which are not considered to be normal, recurring or part of the ongoing operations.

“Foreign Currency Translation” means the period-over-period impact of foreign currency translation, which is calculated by applying current-year foreign exchange rates to the various functional currencies in our business to our reporting currency of US dollars for the same period in the prior year.

“(Gain)/loss on disposal,” a caption on our consolidated statements of income which reflects net proceeds received as compared to net book value related to sales of books of business and other divestiture transactions, such as the disposal of a business through sale or closure.

We are presenting EBITDAC - Adjusted Post FX, EBITDAC Margin - Adjusted Post FX and Diluted Net Income Per Share - Adjusted Post FX for the current and prior year periods contained within this presentation so these non-GAAP financial measures compare both periods on the same basis.

Our industry peers may provide similar supplemental non-GAAP information with respect to one or more of these measures, although they may not use the same or comparable terminology and may not make identical adjustments and, therefore comparability may be limited. This supplemental non-GAAP financial information should be considered in addition to, and not in lieu of, the Company's condensed consolidated financial statements.
Company Overview
Our Vision

Be the leading global provider of insurance solutions for our customers.
Business Highlights

- Long-term track record of profitable revenue growth - organic and via acquisition
- Experienced leadership team and strong performance-based culture
- Highly diversified revenue base, deep expertise and broad distribution network
- Operating model consistently generates industry-leading financial metrics
- Disciplined capital allocation strategy fueled by strong liquidity and cash flow conversion

Acquisitions
Successful integration of more than 625* acquisitions.

**Rationale**

- Create long-term shareholder value
- Find high-quality talent that fits culturally
- Enhance and expand our capabilities
- Expand geographic presence
- Leverage carrier relationships and diversification

**Principles**

- Apply disciplined approach to evaluating prospective acquisitions
- Engage senior operating leaders throughout process
- Must fit based on strategic and operational alignment
- Ensure talent alignment with guiding principles
- Require history of strong growth and performance culture

*Acquisitions from 1993 through June 30, 2023*
**Acquisitions Overview**

**Typical M&A Structure**

- Minimum and maximum purchase price
- Agreed-upon baseline and projected pro forma
- Earnout typically calculated based upon financial performance over a one to three year period
- Structured to retain new teammates
- Leverage proven integration plans

**Acquired Revenue**

1 Represents the approximate annual revenue of businesses and books of business acquired between 2013 and 2022.
Technology & Innovation
Production Stability & Security

- Core platforms by segment continuing the journey of maturity and improving business outcomes
- Proactive platform rollout using automation to block attacks and protect key information

Actionable Analytics

- Data-driven decisions are driving results and providing actionable insights to improve solutions
- Deliver solution recommendations integrated in teammates' workflows

Innovation Agenda

- Continue to find ways for small innovations to impact the business and improve results
- Partner with early-stage investments to find new and impactful ways to drive results
### Key Focus Areas

#### Data & Artificial Intelligence (AI)
- Enhance the customer experience
- Deepen carrier relationships
- Increase process efficiency
- Enable innovation
- Fuel sales & growth

#### Security as a Foundation
- Cybersecurity awareness
- Fit-for-purpose security program
- Business enabler
- Industry thought leadership
- Security integrated into operating model
Our People Strategy

- Listening to our teammates through BE Our Best Survey, TRGs, focus groups and more
- Creating opportunities for teammates to grow their careers, personal wealth and network
- Attract the best diverse talent that fits culturally
- Immersive onboarding experience
- Developing future leaders through robust development, next-level leadership as well as an inclusive culture rich in diversity
The Power of Our Culture

Teammate Snapshot

16k+
As of June 30, 2023

What Teammates Say

94%
Feel accomplished and a sense of pride in their work

95%
Think management is honest, ethical and competent

Feel they are given a lot of responsibility

Felt welcome when they joined our team

Workplace Awards

¹ Includes original purchase price plus subsequent earnout payments

² Defined as net cash provided by operating activities. Cash flow for years 2020 and 2021 have been restated under the fiduciary model. Legacy method of cash flows is used for years prior to 2020.
### Financial & Capital Allocation Policy

- Maintain low leverage, industry-leading margins, high cash flow conversion and investment-grade ratings
- Optimize financial flexibility in line with growth objectives
- Target Net Debt Outstanding to EBITDAC ratio of 0 - 2.5x and Total Debt Outstanding to EBITDAC ratio of 0 - 3.0x
- Balance of returns and risks through allocation of capital to internal investments, acquisitions, dividends and share repurchases

### Liquidity Profile

- Generated $881M of Cash Flow from Operations for the year ended 2022, growing 9% over 2021
- $650M cash on balance sheet as of 12/31/2022
- Undrawn $800M Revolving Credit Facility, with expansion features for an additional $900M under various credit agreements
- Financial covenants include max Net Debt Outstanding to EBITDAC ratio of 3.5x
